-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 7/19/06.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 3632

This is the first Office Action for the serial number 10/757,898, FACIA GUARD BRACKET, filed on 1/15/04.

***Election/Restrictions***

The restriction requirement filed on 6/23/06 has been withdrawn in view of new restriction requirement shown below.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to apparatus, classified in class 248, subclass 48.1.
- II. Claims 7-8, drawn to method, classified in class 29, subclass 33R.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used as flag holder mounted on vehicle door window.

During a telephone conversation with Matthew Gipson on 8/7/06 a provisional election was made without traverse to prosecute the invention of I, claims 1-6. Affirmation of this election must be made by applicant in replying to this Office action. Claims 7-8 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

### ***Drawings***

The drawings are objected to because reference numbers 12, 32, 34, 36 and 38 show hidden lines which are in error because they are not designed to be hidden. The hidden lines should be changed to solid lines. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent # 5,573,227 to Hemauer et al.

Hemauer et al. teaches a bracket (200) comprising a first generally U-shaped recess (located in between 210 and 240), a fastening member (46 shown in figure 5) and a second generally U-shaped recess (20c). The bracket includes an extension (10) having one or more generally U-shaped recess (20a-20b). Furthermore, Hemauer et al. teaches plurality of brackets (see figure 5).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hemauer et al. in view of US Patent # 5,314,167 to Holloman.

Hemauer et al. teaches the fastening member but fails to teach the fastening member is a bolt. Holloman teaches the fastening member is a bolt (20). It would have been obvious for one of ordinary skill in the art at the time the invention was made to have replaced Hemauer et al.'s fastening member with bolt as taught by Holloman to provide convenience for detaching the bracket from the truss.

### ***Conclusion***

Art Unit: 3632

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

US Patent # 5,515,941 to Palmer et al.

US Patent # 6,039,150 to Palmer

Palmer teaches bracket for supporting guard rail.
